Challenges can be stepping stones or stumbling blocks. It's just a matter of how you view them.

Most people are about as happy as they make up their minds to be.

Problems are opportunities in work clothes -

There are always a few un-popped kernels at the bottom of the popcorn bucket.

You can't tell how far a frog can jump just by looking at him.

Don't judge a book by its cover, a person by his color, or a doughnut by its hole.

You can make your crystal ball say whatever you want it to say.

When you are average you are as close to the bottom as you are to the top.

A person who aims at nothing in life is sure to hit it.

The self-fulfilling Prophecy- The perception quite often becomes the reality.

Aim for the sun. You may not reach it, but you'll fly higher than if you never aimed at all.

A little spark may kindle a great fire.
